

multiclip® CLG 370

This clip system joining profile for matching floors can also compensate slight differences in height, up to 3 mm. The modular concept provides you with the possibility to adjust to other paving, matching all thicknesses using one or more clips. Thanks to the 16 mm space left empty underneath, **MULTICLIP®** profile works also as an expansion joint allowing for to ± 5 mm movement of the wood covering. As a matter of fact the general dampness or humidity factors are calculated to act 0,5 mm on dilatation per linear meter of bay on double-layer laminated wood flooring.
